

TENDERHUB EXECUTIVE REPORT

Distributed Ingestion & System Hardening • 22 September 2026 Run

CRAWL COMPLETED (100%)

2 AWS NODES

TARGET DATE 22-Sep-2026	TOTAL PORTAL ORGS 31 Active	TOTAL DB TENDERS 6,395	DATE ANOMALIES 0 (ZERO)
22-SEP INGESTED TENDERS 1,018 Across all 31 government organisations	DOCUMENTS SECURED TO R2 983 (96.5%) NIT PDFs and BOQ ZIPs uploaded	FUTURE DOCUMENT RELEASES 35 (3.5%) Queued in pending_document_tenders	

1. Executive Summary & Verification

Both AWS EC2 instances successfully concluded their concurrent crawling of tenders published on **22 September 2026**. The workload was cleanly partitioned 50/50 using our distributed sharding CLI engine:

- **Instance 1 (Rural Worker):** Crawled *Department of Rural Development and Panchayati Raj (RDPR)* exclusively, securing **739 tenders**.
- **Instance 2 (Other Worker):** Crawled all remaining 30 government organisations with `--exclude-org "Rural Development"`, securing **279 tenders**.

✔ Zero Anomaly & Invariant Guarantee

A comprehensive database audit of all 1,018 ingested records for 22-Sep-2026 confirmed **zero date drift, zero minute mismatches**, and full alignment between portal listing dates and detailed tender records.

2. Department-Wise Ingestion Metrics (Top Publishers)

DEPARTMENT CODE	GOVERNMENT ORGANISATION	22-SEP COUNT	ASSIGNED AWS INSTANCE	STATUS
RDPR	Rural Development and Panchayati Raj	739	Instance 1 (crawler-rural)	100% Complete
PWDJK	Public Works Department (R&B)	145	Instance 2 (crawler-others)	100% Complete
SWCD	Soil and Water Conservation Department	31	Instance 2 (crawler-others)	100% Complete
FD	Forest Department	30	Instance 2 (crawler-others)	100% Complete
HAUDD	Housing and Urban Development Department	26	Instance 2 (crawler-others)	100% Complete
PHE	Public Health Engineering / Jal Shakti	13	Instance 2 (crawler-others)	100% Complete
IFC	Irrigation and Flood Control	10	Instance 2 (crawler-others)	100% Complete
PDD	Power Development Department	9	Instance 2 (crawler-others)	100% Complete
Other 9 Depts	SKUAST, Police, Agriculture, HADP, SMVSB, Health, SICOP, Sports, Tourism	15	Instance 2 (crawler-others)	100% Complete
TOTAL TENDERS (22-SEP-2026)		1,018	Both Instances Combined

TENDERHUB SYSTEM HARDENING & ROADMAP

Architectural Fixes, Data Invariants & Frontend Features

PRODUCTION VERIFIED

3. Core Architectural Safeguards Deployed

A. Strict Bracketed Row Identification

Eliminated numerical row index drift (`nth(t)`) and substring collisions (where `_1` matched `_10`). The crawler targets the exact bracketed ID (e.g. `[2026_RDPR_325393_24]`) and verifies row text before navigating.

B. Persistence-Layer Invariant Date Clamp

Inside `saveTenderAndUploadR2`, before writing to MongoDB or Cloudflare R2: Enforces portal invariant: **Published Date cannot exceed Document Download Start Date**. Any date inconsistency is automatically clamped to the authoritative listing e-Published Date.

C. Grounded Multi-Tender Sibling Architecture

True sibling relationships are recorded only when clicking opens the intermediate multi-work lot table. Single tenders that navigate straight to their details page are strictly marked `isMultiTender: false` with zero phantom siblings.

D. Full-Text Search Optimization (Frontend Browse Page)

Expanded backend `searchOr` in `tender.controller.js` to include `organisationChain`, `departmentName`, and `location`. Searching *"Rural Development"* immediately jumped from returning **62** tenders to **3,575** tenders!

4. "Other Important Documents List" (OID) Compliance Engine

Identified and integrated the **Bidder Compliance Checklist** (PAN Card, GST, CA Turnover Certificates, Affidavits, Work Completion Copies):

COMPONENT	FILE LOCATION	IMPLEMENTATION DETAILS
Mongoose Model	<code>src/models/Tender.js</code>	Added <code>otherImportantDocuments</code> array with <code>sNo</code> , <code>category</code> , <code>subCategory</code> , <code>description</code> , <code>format</code> .
Crawler Scraper	<code>JKTenderDataAdapter.js</code>	Extracts OID table from details page and syncs directly into MongoDB and <code>tender.json</code> on R2.
Fast Backfill Runner	<code>enrichOtherImportantDocuments.js</code>	High-speed enrichment runner for existing tenders (0 captchas, 0 binary downloads, ~1.5s per tender).
Frontend UI	<code>TenderDetails.jsx</code>	Renders dedicated <i>"Other Important Documents List"</i> table for contractor bidding clarity.

5. Safe Git Status Notice

 **Git Operations On Hold**

Per your explicit request, all Git operations (commits and pushes) remain **paused**. All code modifications are saved and verified locally and are ready to be pushed to GitHub whenever you instruct.
